

**Position: EE - Project Manager Water Management**

**Area:** Cape Town

**Salary:** R 660 000 pa (negotiable)

Employment Equity Position. Are you passionate about the issues our country, and specifically our province is facing with regards to the water crisis and the management thereof and want to make a difference? Then this might be for you! Our client is a German organisation supporting European companies in establishing business contacts with potential customers for their products and services.

This crucial role will see you maintaining relationships with key stakeholders with the local partners – ranging from local to national government to independent organisations and then linking these to the international partners offering water management solutions.

This is the ideal role for a candidate with a related degree and a proven relationship management/lobbying skill who is used to negotiating win-win situations amongst parties. There will be extensive travel in South African and neighbouring countries.
